Health and Safety Course #202

Field inspections involve a certain degree of risk. Inspections of wastewater treatment plants, manufacturing plants, chemicals and power generation are each associated with various hazards. A safe field inspection depends on the recognition, evaluation and control of hazards. Cal/OSHA regulations and established safety policies are continually being updated. This course/manual has been assembled as a "hands-on" tool for all personnel conducting field activities.

July 27, 2010

8:30 am – 3:00 pm

**San Diego Air Pollution Control District
10124 Old Grove Road San Diego, California 92131
Conference Room**
